

Products

BLUE STAR Cable Cutters are designed to cut insulated aluminum and copper cable of different diameters, preferably at most angles with minimum distortion of cables. Drop Forged alloy Steel jaws fitted on strong tubular handles with PVC comfort grip helps cutting of cables with minimum fatigue for longer period of time by even the unskilled operator. All cable cutters are available with replaceable jaws.

Each jaw is precisely grinded on the CNC machine to perfectly match the curve of opposite jaw, thereby giving swift cuts on the cable.
